

LQ (untransformed): top 1% PSS pairs

126 species · 7875 available pairs · 79 pairs in top tail

- Family**
- Aotidae
 - Atelidae
 - Callitrichidae
 - Cebidae
 - Cercopithecidae
 - Cheirogaleidae
 - Daubentoniidae
 - Galagidae
 - Hominidae
 - Hylobatidae
 - Indriidae
 - Lemuridae
 - Lorisidae
 - Pitheciidae
 - Tarsiidae

**Nodal tail rate
(C / opportunity)**

Top-tail pair count

Each pair is assigned once to its MRCA. Colour is the observed top-tail fraction among pairs available at that node; size is the raw count.
Tip bars show untransformed LQ (LQ_mammal) on a linear zero-to-maximum scale (maximum = 1.831); bars and terminal points share family colour.
